

**MOBILE APPLICATION
DEVELOPMENT
(3170726)**

Index

Experiment Sr. No.	Tasks
1.	Install Android Studio with Latest Configuration in your System.
2.	Develop an android app which displays “Hello World” message
3.	Design Login activity and implement control events : Use EditText, Checkbox and Buttons
4.	Develop an android app which displays a form to get following information from user. 1) Username 2) Password 3) Email Address 4) Phone Number 5) Country
5.	Implement Practical 3 and 4 using following layouts: 1. Linear Layout 2. Relative Layout 3. Table Layout
6.	Create sample application that demonstrates activity life cycle’s all methods.
7.	Create Activities & implement following 1. Implicit intent 2. Explicit Intent 3. StartActivityForResult
8.	Using Android, Create a login Activity. It asks “username” and “password” from user. If username and password are valid, it displays Welcome message using new activity
9.	“Happy Birth Day” App using TextView and ImageView
10.	Create “Hello Toast” App by implementing a click handler method for the button to display a message on the screen when the user clicks. Use Linear Layout for creating view.
11.	Create a Recycler View and list the details of student using following fields: 1. Name 2. Address 3. Photo (Image) 4. Delete (Button Operation)
12.	Practical: Theme, Custom Styles, Drawables

13.	Create the MP3 player like application with service
14.	The Simple Calculator app has two edit texts and four buttons. When you enter two numbers and click a button, the app performs the calculation for that button and displays the result.
15.	Develop one App. Which Contains Specific User Interface and design Interface.
16.	Using experiment 4 and Save user data in a database.

Mandatory Online Courses:

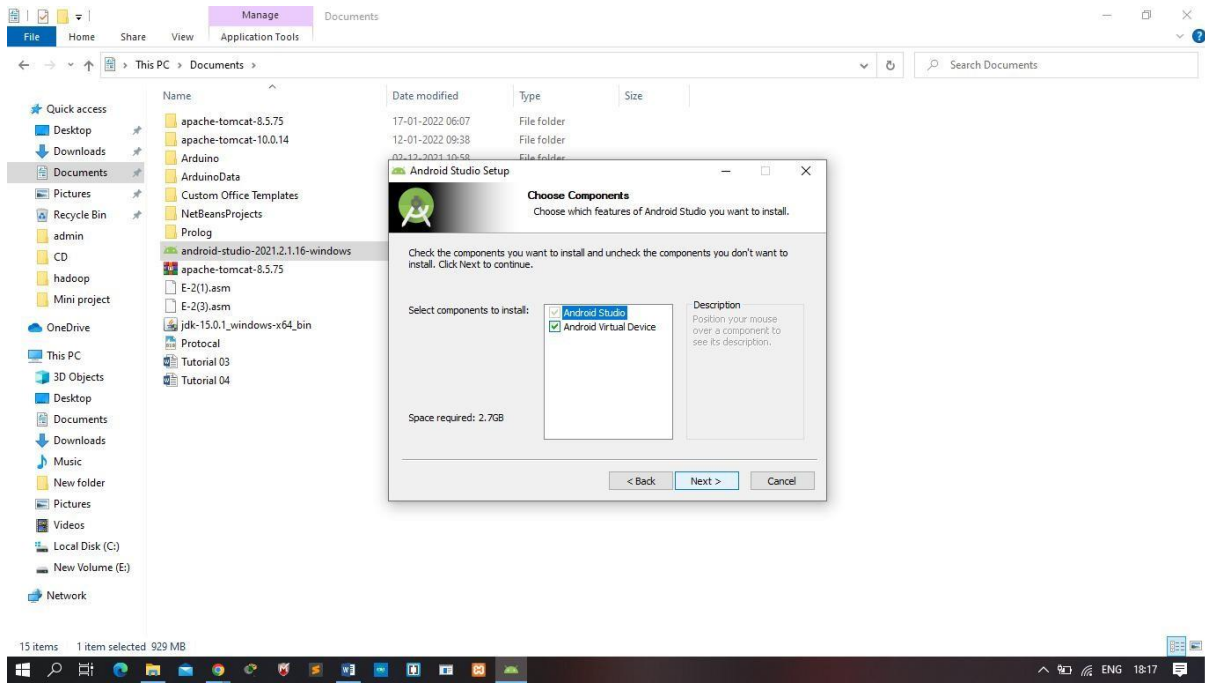

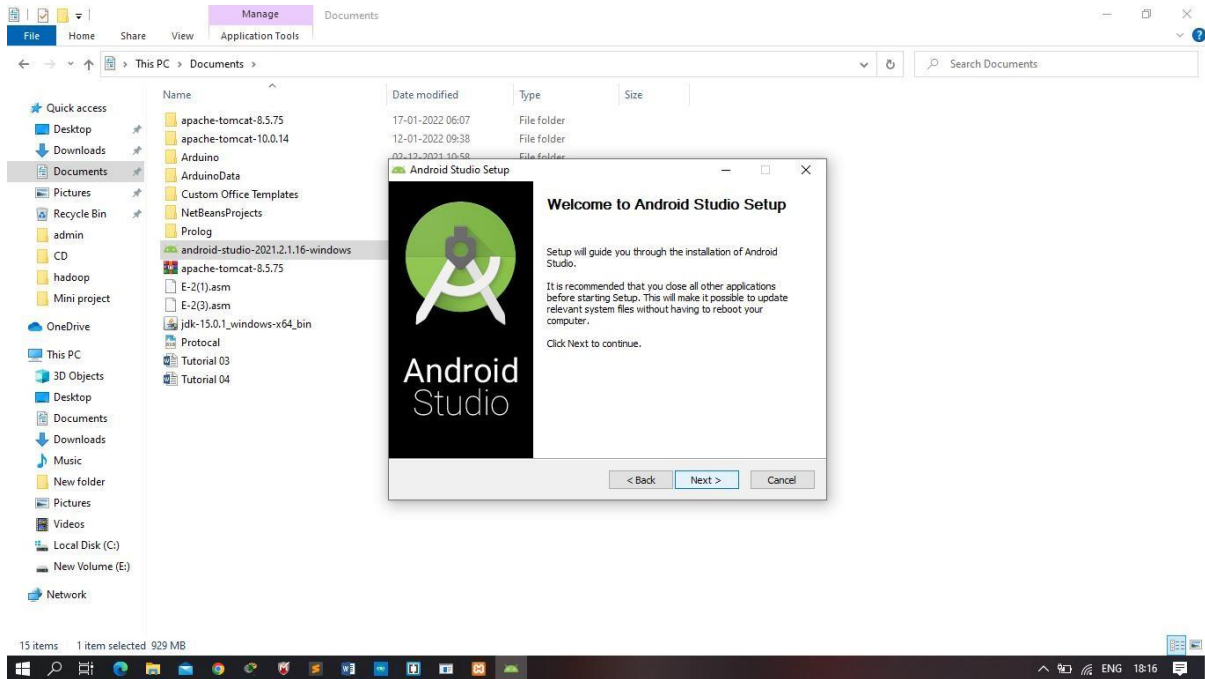

1. <https://learn.udacity.com/courses/ud851>
2. <https://www.udemy.com/course/learn-android-application-development-y/>

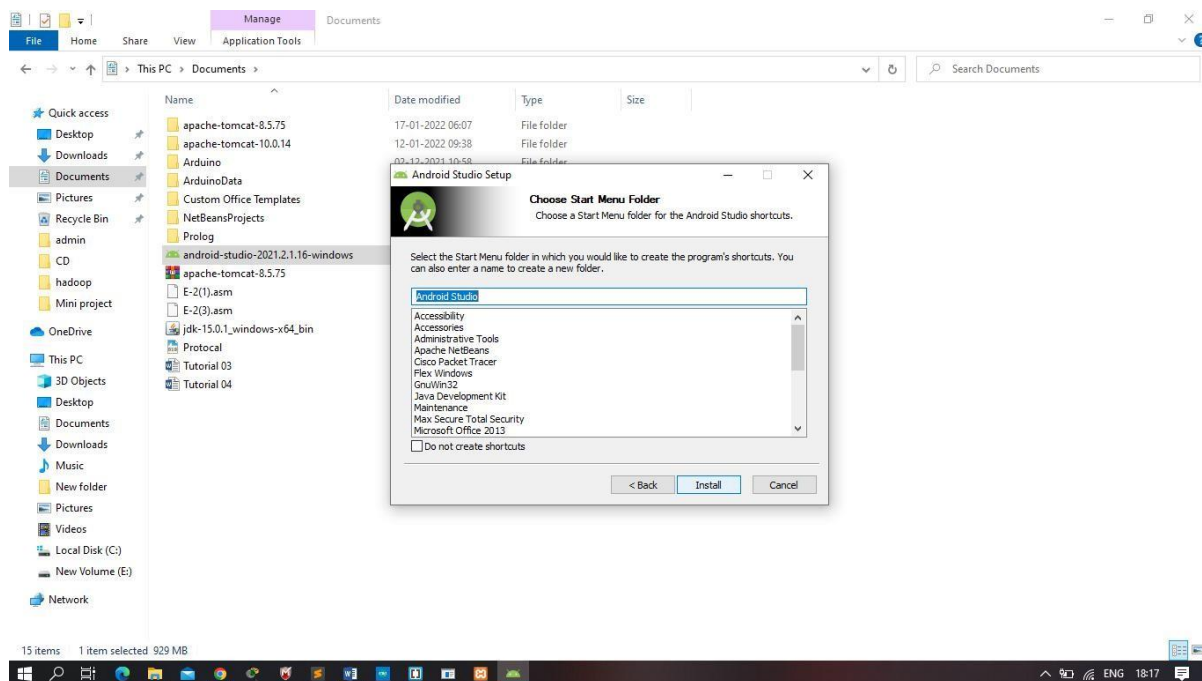

Other

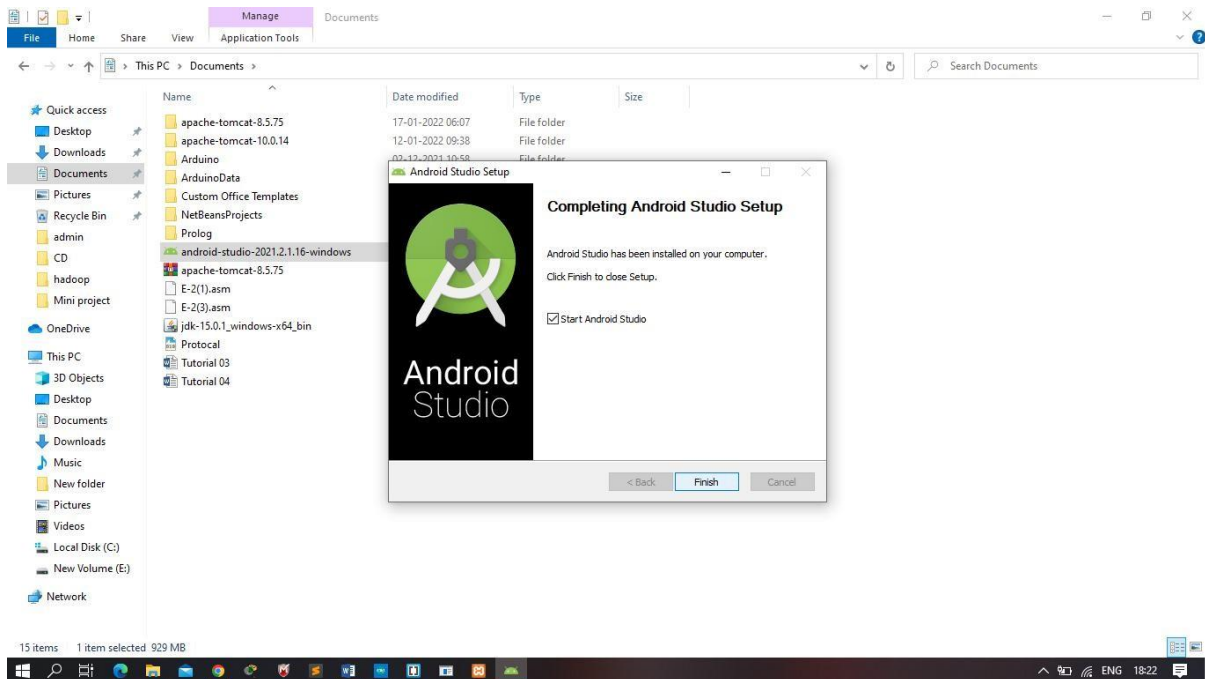

1. Mini Project by including all relevant concepts. (In team of max. 3)

EXPERIMENT-1

Title: Install Android Studio with Latest Configuration in your System.

EXPERIMENT-2

Title: Develop an android app which displays “Hello World” message

CODE

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />
</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.example.practical2;
import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;
public class MainActivity extends AppCompatActivity {

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }
}
```

SCREENSHOTS OF APP

EXPERIMENT-3

Title: Design Login activity and implement control events : Use EditText, Checkbox and Buttons

COMPONENTS USED TO DEVELOP APP:

CODE (LAYOUTS+ACTIVITIES):

LAYOUTS:

activity_main.xml

```
<?xml version = "1.0" encoding = "utf-8"?>
<RelativeLayout xmlns:android = "http://schemas.android.com/apk/res/android"
    xmlns:tools = "http://schemas.android.com/tools" android:layout_width="match_parent"
    android:layout_height = "match_parent"
    android:paddingLeft= "50dp"
    android:paddingRight = "50dp"
    android:paddingTop = "50dp"
    android:paddingBottom = "400dp"
    tools:context = ".MainActivity">

    <TextView
        android:id="@+id/textview"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:layout_alignParentTop="true"
        android:layout_centerHorizontal="true"
        android:text="Login"
        android:textColor="@color/white"
        android:textSize="35dp"
        android:textStyle="bold" />

    <EditText
        android:id="@+id/editText"
        android:layout_width="wrap_content"
        android:layout_below="@+id/textview"
        android:layout_height="wrap_content"
        android:layout_alignParentStart="true"
        android:layout_alignParentLeft="true"
        android:layout_alignParentEnd="true"
        android:layout_alignParentRight="true"
        android:layout_marginTop="46dp"
        android:focusable="true"
        android:hint="Enter Name" />
```

```
<EditText
    android:id="@+id/editText2"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_below="@+id/editText"

    android:layout_alignEnd="@+id/editText"
    android:layout_alignRight="@+id/editText"
    android:layout_alignParentStart="true"
    android:layout_alignParentLeft="true"
    android:ems="10"
    android:hint="Password"
    android:inputType="textPassword" />

<Button
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="login"
    android:id="@+id/button"
    android:layout_alignParentBottom="true"
    android:layout_toLeftOf="@+id/textview"
    android:layout_toStartOf="@+id/textview" />

<Button
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="Cancel"
    android:id="@+id/button2"
    android:layout_alignParentBottom="true"
    android:layout_toRightOf="@+id/textview"
    android:layout_toEndOf="@+id/textview" />
</RelativeLayout>
```

MainActivity.java

```
package com.example.practical3;

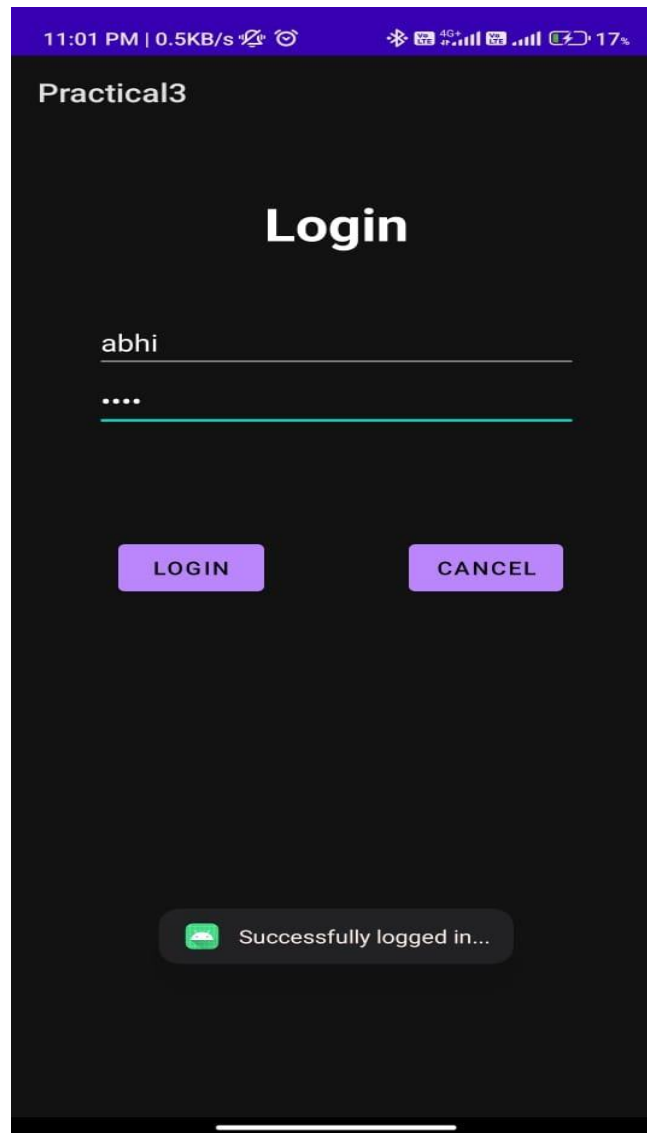

import androidx.appcompat.app.AppCompatActivity;

import android.graphics.Color;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.EditText;
import android.widget.TextView;
```

```
import android.widget.Toast;

public class MainActivity extends AppCompatActivity {
    Button b, c;
    EditText e, e1;
    TextView t;
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        b = (Button) findViewById(R.id.button);
        c = (Button) findViewById(R.id.button2);
        e = (EditText) findViewById(R.id.editText);
        e1 = (EditText) findViewById(R.id.editText2);
        t = (TextView) findViewById(R.id.textview);
        b.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                if(e.getText().toString().equals("abhi")&&
                e1.getText().toString().equals("abhi")){
                    Toast.makeText(getApplicationContext(),"Successfully logged
in...",Toast.LENGTH_SHORT).show();
                }
                else {
                    Toast.makeText(getApplicationContext(),"Wrong
details",Toast.LENGTH_SHORT).show();
                    t.setVisibility(View.VISIBLE);

                textview.setText("Successfully submitted");
            }
        }
    });
}

```

SCREENSHOTS OF APP

The screenshot shows a mobile application interface for a registration form. The status bar at the top displays the time as 9:46 PM, a data speed of 0.0KB/s, 4G connectivity, and a 40% battery level. The app title "RegisterForm" is centered at the top of the screen. Below the title, there are five text input fields with placeholder text: "Enter First Name", "Enter Last Name", "Enter Email Address", "Enter Phone Number", and "Enter Country Name". The "Enter Last Name" field is currently active, indicated by a blue cursor. Below the input fields is a checkbox labeled "Display Details". At the bottom of the form is a blue button with the text "SUBMIT". Below the button, the text "Your Details:" is displayed, followed by a large empty space for displaying the user's information.

EXPERIMENT-5

Title: Implement Practical 3 and 4 using following layouts:

- 1. Linear Layout**
- 2. Relative Layout**
- 3. Table Layout**

LAYOUTS:

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <Button
        android:id="@+id/linear"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Linear layout"
        app:layout_constraintBottom_toTopOf="@+id/relative"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent"
        android:onClick="linearlayout"/>

    <Button
        android:id="@+id/relative"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="relative layout"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintTop_toBottomOf="@+id/linear"
        app:layout_constraintBottom_toTopOf="@+id/table"
        android:onClick="relativelayout" />

    <Button
        android:id="@+id/table"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="table layout"
```

```
app:layout_constraintBottom_toTopOf="@id/other"
app:layout_constraintEnd_toEndOf="parent"
app:layout_constraintStart_toStartOf="parent"
app:layout_constraintTop_toBottomOf="@+id/relative"
android:onClick="tablelayout"/>
<Button
    android:id="@+id/other"
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:text="Other app"
    app:layout_constraintStart_toStartOf="parent"
    app:layout_constraintEnd_toEndOf="parent"
    app:layout_constraintBottom_toBottomOf="parent"
    app:layout_constraintTop_toBottomOf="@+id/table"
    android:onClick="otherapp"/>
</androidx.constraintlayout.widget.ConstraintLayout>
```

activity_linear_layout.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"

EXPERIMENT-6

Title: Create sample application that demonstrates activity life cycle's all methods.
COMPONENTS USED TO DEVELOP APP:

CODE (LAYOUTS+ACTIVITIES):

LAYOUTS:

activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <TextView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:text="Hello World!"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />

</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.example.practical6;
import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;
import android.util.Log;

public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        Log.d("lifecycle", "oncreate invoked");
    }
    @Override
    protected void onStart(){
        super.onStart();
    }
}
```

```
        Log.d("lifecycle","onstart invoked");
    }
    @Override
    protected void onResume(){
        super.onResume();
        Log.d("lifecycle","onresume invoked");
    }
